

## ENVIRONMENTAL POLICY

FUTURECO BIOSCIENCE'S Environmental mission includes conducting its business in compliance with required environmental laws, regulations and permits. The company works to continuously improve environmental performance in all operations and is committed to taking action:

- To take the necessary actions to reduce the environmental impact of our manufacturing, administrative and research and development activities.
- To systematically reduce wastes, recycling and reusing whenever possible, and make efficient use of natural resources, raw materials and energy.
- To provide all employees with the training and resources required to meet our environmental objectives.
- To promote the development of plant protection and nutrition products aimed to reduce the environmental impact of agriculture.
- To communicate environmental policy among employees, customers, suppliers, subcontractors and other stakeholders and maintain an environmental management system appropriate to the nature, scale and environmental impacts of our activities and services.
